Patrick Fanella

SENIOR FULL-STACK AND BACKEND ENGINEER

CHICAGO, IL · REMOTE OR CHICAGO HYBRID · 630-408-4979 · FANELLA.PATRICK@GMAIL.COM
patrickfanella.co · github.com/PatrickFanella · linkedin.com/in/patrick-fanella

PROFILE

Senior full-stack and backend engineer building Go, Python, and TypeScript services with React interfaces. At DeliverZero, built inventory, returns, and partner integrations that reduced manual operations work by about 25%. Independent work covers searchable media, browser rendering, and self-hosted tools that I test, deploy, and operate.

SKILLS

Languages: Go, Python, TypeScript, SQL
Product: React, React Native/Expo, WebCodecs, Web Audio, accessibility, Playwright
Backend and data: PostgreSQL, PostGIS, Redis, OpenSearch, FastAPI, REST APIs, durable jobs
Delivery: Docker, Linux, CI/CD, migrations, observability, backup and recovery

ENGINEERING EXPERIENCE

Subculture Collective · Chicago **May 2023 – Present**
Founder and engineer at subcult.tv, an independent open-source studio. I design, build, deploy and run each product.

- Built and operate clpr.tv, a Twitch discovery app with a Go API, React client, PostgreSQL, hybrid keyword/vector search, playlists, and moderation.
- Built HasanAra and its Rekolekt core, combining a React transcript-search frontend with Python/FastAPI services, durable GPU transcription jobs, PostgreSQL, and OpenSearch.
- Built Undertow, a React music-video editor with layered WebGL visuals, timed lyrics, and local MP4 export through fixed-step WebCodecs rendering and seekable Blob chunks.
- Built Tadooer, a self-hosted planner with queued task edits, CalDAV ETag conflicts, and server-authoritative focus sessions across web and prerelease desktop/mobile clients.
- Built a Go MCP server and plugin bridge for Super Productivity, with typed tool contracts, dry-run-first bulk changes, local file IPC, and protocol/package checks.
- Deliver container releases through CI, browser tests, monitored services, documented rollback, and verified backup and restore procedures.

DeliverZero · Chicago / New York / Denver **Jun 2022 – Jun 2023**
Full-stack engineer, working directly with the CTO at a reusable food-container startup

- Built tracking, returns, inventory, and dashboard workflows supporting launches across three markets through delivery-platform, POS, and partner API integrations.
- Built replenishment monitoring, exception routing, and self-service partner workflows that reduced manual operations work by approximately 25%.
- Designed idempotent integrations, retries, reconciliation, and partner test harnesses for thousands of weekly inventory and customer-status updates.
- Delivered internal and partner reporting on reuse impact, including water, waste, and emissions metrics.

OTHER EXPERIENCE

Retail Data Systems · Lisle, IL **Nov 2023 – Mar 2026**
Support specialist

- Supported hardware and software for four point-of-sale platforms installed at 13,000+ locations.

Earlier: assistant executive housekeeper at Boyne Resorts in Big Sky, MT, leading 40+ staff across four hotels; landscaping team lead; kitchen supervisor; assistant audio engineer.
